1. Alpha

◆ DEFINITION 1.1

A holomorphic thing is a thing.

★ ◆ THEOREM 1.2 — Rouché's Theorem

Suppose the hypotheses hold. Then the conclusion holds.

Proof. By hypothesis, the claim holds. A direct computation gives

$$z_1 + z_2 = z_2 + z_1$$

. Therefore the conclusion holds. ■

★ **Remark.** Nasty escaping: 5 # \$ [] { } @ * _ ` < > ~ 1/2 // end.

≡ CLAIM 1.3

The converse of [Theorem 1.2](#) is false: a witness exists.

 **Notation.** One writes $x = (x, 0)$.

▷ LEMMA 1.4

A small stepping stone.

2. Beta

◇ PROPOSITION 2.1

Counter reset check: expect 2.1.
